How Be Right works

22 October 2026

A repair request moves between the lanes from left to right. The thick box is the step where the customer says yes: nothing is sent or charged before it. Dashed arrows show what the customer and technician see.

What each role can do

22 October 2026

Customer

Website and app, own account

- Create an account (all fields required)
- Book: 16 services + Other, questions, photos, date, map pin
- Approve or decline the price (asked to confirm)
- Cancel before the visit; after it is scheduled, ask to cancel
- Follow the technician live on a map
- Rate the job; report a problem within 7 days
- Emergency: no account needed
- My account: profile, details, email, password, delete

Specialist

Dashboard: Requests, Emergencies, Technicians

- Requests: review, preparation note, send the price
- Assign a technician and schedule the visit
- Follow jobs (updates within 10 seconds)
- Close a request, or charge the $10 visit fee
- Problem reports: free return visit or a price
- Emergencies: open, send a technician, add details, dismiss
- Technicians: look and contact only

Technician

Added by an admin after a meeting

- Apply: trade, areas, experience, tools, transport, photo
- My jobs: one folded card per job
- Call the customer, directions, live location
- Before and after photos (required)
- Report a visit with no repair
- Partner parts shops near each job
- Profile with photo, rating and jobs done

Admin

Admin area: everything a specialist does, plus

- Applications: call, meet, accept or reject
- Technicians: documents, remove
- Parts shops: add, edit, hide, delete
- Team: add staff, change roles, reset two-step
- Customers, Overview figures, Activity log
- Sign-in: password + authenticator code

Everything works on the website and in the phone app, in English and Arabic. Emails go out at each step once the email service is set up. Payments are not in the app yet.
